PORCELANOSA Grupo

pro-skirting

Success in the design and installation of ceramic floors is in the small details. The ceramic tile is the most important element, but there are some complements such as tile spacers, grouts, special tiles for steps and skirting boards that really help to create stylish floors.

Butech expands the pro-skirting range by providing solutions for all types of tile flooring, especially the PORCELANOSA PAR-KER collection, inspired by natural woods. It also incorporates new skirting boards for MICRO-STUK, the new seamless covering of PORCELANOSA Group and technical solutions that allow to use lighting in the junction between walls and floors.
